GitHub: https://github.com/FaisalMohammedElorm

Information Technology graduate of the **University of Ghana** (**BSc Information Technology**) with practical experience in web development and maintenance, currently completing national service at the National Information Technology Agency (NITA). Focused on frontend development, with hands-on exposure to React and React Native and familiarity with Supabase and Firebase. Has worked in team settings using Agile collaboration tools such as Slack and Jira. Interested in software engineering, artificial intelligence and emerging technologies, and keen to contribute to technology solutions that solve real-world problems, with a longer-term aim of growing into AI engineering and product management.

## EXPERIENCE

2026 – PRESENT

### NATIONAL SERVICE PERSONNEL, NATIONAL INFORMATION TECHNOLOGY AGENCY (NITA)

- Current national service placement under the Ministry of Communications, Ghana.

2025

### SOFTWARE ENGINEERING INTERN – WEB DEVELOPMENT AND MAINTENANCE, KUMASI TECHNICAL UNIVERSITY

- Developed and maintained responsive websites using modern web technologies.
- Performed website updates, debugging and performance optimization.
- Collaborated with team members using Slack and Jira to manage development tasks.
- Improved website usability and ensured smooth operation across multiple devices.

APRIL 2024 – MAY 2024

### LAB ASSISTANT, KETA NURSING TRAINING COLLEGE

- Assisted students during practical laboratory sessions.
- Maintained laboratory equipment and ensured a safe working environment.
- Supported lecturers with laboratory preparations and technical assistance.
- Helped organize laboratory materials and records.

## EDUCATION

2022 – 2026

### BSC INFORMATION TECHNOLOGY, UNIVERSITY OF GHANA, LEGON

Bachelor of Science in Information Technology – completed

2019 – 2022

### KETA SENIOR HIGH TECHNICAL SCHOOL, KETA

Member of the Science and Mathematics Club

## SKILLS

- HTML5
- CSS3
- JavaScript (ES6+)
- Tailwind CSS
- React.js
- Next.js
- React Native
- Node.js
- Express.js
- MongoDB
- MERN Stack Development
- Supabase
- Firebase
- Git & GitHub
- Product Management
- Slack
- Jira
- Responsive Web Design
- UI/UX Fundamentals
- Problem Solving
- Communication & Team Collaboration

## PROJECTS

### ECOALERT – ENVIRONMENTAL HAZARD REPORTING PLATFORM

**Technologies:** Next.js, React, Tailwind CSS, Supabase

- Developed a web-based platform for citizens to report, document and monitor community environmental hazards.
- Implemented user authentication, incident reporting and an administrative dashboard.
- Designed to improve communication between citizens and the responsible authorities.

### READERAPP LIMITED WEBSITE

**Technologies:** React.js

- Developed a responsive company portfolio website.
- Created modern user interfaces with mobile-friendly layouts.
- Collaborated within a development team to deliver project requirements.

## CERTIFICATION

- ALX ProDev Frontend Certificate
- ALX Professional Foundations Certificate
- ALX Virtual Assistant Certificate

## LEADERSHIP AND ACTIVITIES

- Cell Leader (Church Leadership)
- Participated in multiple university software development projects.
- Collaborative team member in full-stack web application development.
